GRONY MULTIMEDIA

How to record a sale and look after the customer | Staff guide

1. ONE ITEM: Live Sale

- Set the **quantity** and **price** on the item card. In the **GM box** type the customer's **GM number** (e.g. 45), or their **10-digit phone** (starts with 0), or the first letters of their **name** and pick from the list. Press ✔.
- No customer? Leave the GM box empty. Phone number not in our list? A box drops down: type the **name** and they are saved as a new customer (or tap **Full registration** for email, location and services).
- After ✓ a card asks to **send the purchase message on WhatsApp**. Tap **Send**, then press send in WhatsApp. It lists what they bought, the total, their total work with us and our contacts.

2. SEVERAL ITEMS: MI (multiple items)

- Press **MI** (it turns green). Tap ✔ on each item the customer is buying, or type the item name in the **basket** at the bottom. Check each quantity and price.
- In the basket type the **customer** (GM number, phone or name). New customer? Type the name or use Full registration.
- Press the big green button: it **records every item and issues ONE receipt**. Then tap **Print** or **Send** (WhatsApp). With no customer, the items are recorded but there is no receipt. Close MI with ✕ when done.

3. PAST SALES (yesterday or earlier)

- In the **Sales Log** (or Live Sale's Sales tab) press **+ Past sale**. Pick the **Sale date** in the basket, add the items and customer, press the green button. Do not type past work anywhere else.

4. SALES LOG: every sale, one row each

- The **Customer** column shows who each item was sold to. A faint **+** means no customer was recorded: tap it to add one.
- Tap a **customer's name**: you see everything they bought that day. **Issue receipt for the day** makes one receipt for all of it. Issued receipts have **Print** and **WhatsApp** buttons. **Show all jobs** lists everything they have ever bought and their total.
- **Undo** (the curved arrow at the end of a row) removes a sale; it also comes off the customer's receipt. **Item names** longer than two lines wrap, so every column fits the phone screen.

5. SALES REC and CUSTOMER RECEIPTS

- **Sales Rec:** open a day. The green box **Customers on this day's sales** has **Send on WhatsApp**, or type a name and press **Save as customer**. The **Customer** column shows who bought each item.
- **Cust. Receipts** is only the history: view, search and print. **New receipts are made with MI**, so nothing is typed twice.

6. NEW CUSTOMER

- Left menu **New Customer**: name, **phone (required)**, email, location, services. Save, tap **Send welcome on WhatsApp**, and tell the customer their **GM number**. Always ask for the phone number: it gives them their messages and their total toward the prize.

Golden rules: one customer = one GM number. Record each job once. Phone numbers are 10 digits starting with 0. If the app refuses a sale (price below cost or not enough stock), do not force it: tell the manager. Customers reach GHS 1,000 in total work with us and stand a chance to win a prize.
